TECHNICAL SKILLS

Languages: Dart, JavaScript, TypeScript, Java
Mobile Development: Flutter, Dio, BLoC/Cubit, Riverpod, Provider, Hive, FCM
Backend Development: Node.js, Express.js, NestJS, Spring Boot, RESTful APIs, WebSockets, JWT Authentication
Databases: MongoDB, PostgreSQL, Redis, Firebase (Firestore)
DevOps & Tools: Git, GitHub, GitHub Actions, Fastlane, Firebase App Distribution, FVM, Postman
Architecture & Practices: Clean Architecture, State Management, CI/CD, Real-Time Communication, Geolocation Services

EXPERIENCE

Flutter Developer Intern
DevanaSoft Pvt. Ltd. | Kathmandu, Nepal **August 2026 – October 2026**

- Developed features for a production networking application using Flutter, Clean Architecture, and BLoC/Cubit.
- Implemented local data persistence with Hive to keep core content accessible offline.
- Worked with multi-flavor configurations for separate app environments and managed Flutter SDK versions using FVM.

Flutter Developer Intern
Supreme IT Solutions | Kathmandu, Nepal | Remote **December 2025 – April 2026**

- Developed cross-platform Flutter features for 3+ client applications using Clean Architecture and BLoC/Cubit.
- Integrated REST APIs using Dio and implemented JWT-based authentication flows.
- Collaborated with QA engineers and cross-functional team members to build features, resolve issues, and support releases.

PROJECTS

Ride-Sharing Platform | LINK | *Flutter, Spring Boot, Redis, WebSockets, FCM*

- Built separate rider and driver Flutter applications backed by a Spring Boot REST API, implementing a state-driven ride lifecycle from request and matching to completion or cancellation.
- Developed real-time driver matching using Redis GEO and WebSockets (STOMP), enabling geospatial driver discovery and live location tracking on the rider's map.
- Used Redis Sorted Sets to manage active drivers and detect stale driver entries.
- Implemented continuous background GPS tracking using Android Foreground Services and Firebase Cloud Messaging (FCM) for real-time ride requests and status notifications.

E-Learning Platform | LINK | *Flutter, Node.js, MongoDB, Riverpod, Stripe, FCM, GitHub Actions, Fastlane*

- Built a full-stack e-learning platform with a Flutter app and a Node.js, Express.js, and MongoDB REST API, featuring course filtering, progress tracking, and automated PDF certificate generation.
- Integrated Stripe payments and Firebase Cloud Messaging for push notifications.
- Managed app state with Riverpod and implemented optimistic pagination for smoother list loading.
- Set up CI/CD with GitHub Actions and Fastlane to automate builds and distribute releases through Firebase App Distribution.

Job Portal Application | LINK | *Flutter, Node.js, MongoDB, Provider*

- Developed a Flutter job portal app with a Node.js and MongoDB backend, using database indexing to speed up search.
- Implemented category-based and location-based job filtering.
- Added push notifications for live status updates and used Provider for state management.

Food Delivery Application | LINK | *Flutter, Node.js, Express.js, MongoDB, Firebase*

- Designed modular REST APIs with Node.js, Express.js, and MongoDB for order processing, promotional logic, and ratings.
- Built product browsing, cart management, and checkout flows with JWT-authenticated user sessions.
- Integrated Firebase Cloud Messaging for order tracking and push notifications.

EDUCATION

Birendra Multiple Campus | Tribhuvan University **2022 – Expected December 2026**
Bachelor of Science in Computer Science and Information Technology (BSc. CSIT) *Bharatpur, Chitwan*
